VOLUME 42 1988

SUBJECT INDEX

ACTH, 41
  analgesic efficacy
  drug interaction
  morphine tolerance
Active avoidance, 439
  freezing
  light-dark box
  passive avoidance
  strain differences
Activity/reactivity measures, 97
  lesions, lateral/medial septal
  locomotor activity
Adiposity, 389
  dietary fat selection
  weight cycling
Adrenalectomy
  aldosterone, 137
  chronic corticosterone replacement, 581
  macronutrient selection pattern, 581
  potassium-induced food aversion, 137
Aerobic training, 293
  human studies
  psychosocial stress
  sympathoadrenal response
Age differences
  electrophysiological measures, 163
  locomotor activity, 163
  monkeys, squirrel, 53
  occipital cortex, 163
  radial maze performance, 277
  rats, Fischer 344, 277
  response strategy, 277
  sucrose solutions, 53
  superior colliculus, 163
  taste preferences, 53
Aggression
  dominance, 255
  drug interaction, 83
  lidocaine-kindled seizures, 83
  lizards, curly-tailed, 103
  monkeys, stumptail, 255
  pineal complex, 103
  puberty, 255
  sexual behavior, monkeys, 255
  thermoregulation, 103
  urine marking, 41
  water deprivation, 41
Aldosterone, 137
  adrenalectomy
  potassium-induced food aversion
Alloxan, 465
  2-deoxy-D-glucose analgesia
  drug interaction
Alzheimer's disease, 141
  circadian rhythm
  human studies
  light exposure
Amino acids, 591
  conditioned taste aversion
  food intake
  GABA
Ammonium acetate, 471
  food intake
  high protein diet
d-Amphetamine, 575
  lesions, fimbria
  memory
Analgesia, 131
  benzodiazepine systems
  deer mouse
  scent
Analgesic efficacy, 41
  ACTH
  drug interaction
  morphine tolerance
Analgesic response
  novel stimuli, 29
  opioid analgesia, 29
  pituitary-adrenal hormone concentration, 323
  pregnancy, 323
  snails, 29
  stress, 29
  stressor controllability, 323
Androgens, 569
  sexual differentiation
Animal models, 343
  medroxyprogesterone acetate
  plasma testosterone
  sexual behavior, male monkeys
Anorexia nervosa
  conditioned food aversion, 245, 401
  zinc deficiency, 245, 401
Antelopes, alcelaphine, 155
  chemosensory investigation
  vomeronasal system anatomy
Anticipatory drinking, 297
  compensatory adjustments
  local rate of intake
Apparatus
  8-arm radial maze, 277
  Automex, 87
  osmotic minipumps, 249
  running wheel, 87
Appetite, 319
  carbohydrates
  CG 10686B
  eating
  dl-fenfluramine
  fluoxetine
  nutrition
  protein
Arterial pressure, 563
  cimetidine-sensitive analgesia
  stress
Artificial raising, 495
  palate cannula
Aspartic acid, 313
  sex differences
  ventilation
Auditory startle, 237
  hyperbaric hyperreflexia
  reticular formation
  sensorimotor reactivity

Basolateral amygdala, 231
  lesions, bilateral ibotenic acid
  sham feeding response
  sucrose
Behavioral despair, 93
  forced swim test
  immobility
  sinking/floating behavior
Behavioral/electrophysiological methods, 207
  motivational-emotional mechanisms
  shelter-seeking
Behavioral energy regulation, 433
  strain differences
Behavioral interactions, 507
  milk availability
  milk intake
Behavioral responses, 125
  β-endorphin
  isolation
  stress
Benzodiazepine antagonists, 461
  non-opioid defeat analgesia
  potent inhibition
  Ro15-3505
Benzodiazepine systems, 131
  analgesia
  deer mouse
  scent
Benzodiazepines, 211
  ingestional responses
  sham feeding
Biotelemetry, 287
  chronic infusion
  circadian rhythms
  lipopolysaccharide
Blood parameters, 1
  carbohydrates
  cats
  dietary protein
  stress
Blood pressure, 485
  catecholamines
  coherent pattern
  corticosterone
  rats, males
  social behavior
Body fluid homeostasis, 499
  strain differences
  water intake
Brain
  amygdala, 613
  basolateral amygdala, 231

fimbria, 575
forebrain, 113
hippocampal perforant pathways, 371
lateral septum, 97
medial basal hypothalamus, 191
medial cerebellum, 145
medial perforant pathways, 371
medial septum, 97
midbrain, 113
occipital cortex, 163
paraventricular hypothalamic nucleus, 517, 529
peripeduncular nucleus, 417
preoptic area, 191
septum, 167
substantia nigra, 359
superior colliculus, 163
ventral medulla, 517
ventral pons, 517
ventral tegmental area, 359
ventromedial hypothalamus, 145

Calcium antagonist, 447
memory
simple associational learning
Carbohydrates
appetite, 319
blood parameters, 1
cats, 1
CG 10686B, 319
dietary protein, 1
eating, 319
dl-fenfluramine, 319
fluoxetine, 319
nutrition, 319
protein, 319
stress, 1
Carbon disulfide, 119
semiochemical
socially-induced diet choice
Carcass composition, 551
diet composition
food intake
Castration
hormonal restoration, 77
sexual behavior, 77
sexual behavior, masculine, 69
strain differences, 69
Catecholamines
blood pressure, 485
chronic exercise, 365
coherent pattern, 485
corticosterone, 485
energy balance, 365
rats, males, 485
social behavior, 485
Cats, 1
blood parameters
carbohydrates
dietary protein
stress
CG 10686B, 319
appetite
carbohydrates
eating
dl-fenfluramine
fluoxetine
nutrition
protein
Chemosensory investigation, 155
antelopes, alcelaphine
vomeronasal system anatomy
Chemosignals, 19
infanticide
mating
vomeronasal system
Cholecystokinin octapeptide, 203
passive avoidance latencies
Cholinergic control, 179
lesions, ventromedial hypothalamic
sexual behavior, female rat
Chronic corticosterone replacement, 581
adrenalectomy
macronutrient selection pattern
Chronic exercise, 365
catecholamines
energy balance
Chronic infusion, 287
biotelemetry
circadian rhythms
lipopolysaccharide
Cimetidine-sensitive analgesia, 563
arterial pressure
stress
Circadian activity rhythms, 183
constant-light housing
geniculo-hypothalamic tract-ablation
hamsters
Circadian rhythms
Alzheimer's disease, 141
biotelemetry, 287
chronic infusion, 287
human studies, 141
light exposure, 141
lipopolysaccharide, 287
Circadian wheelrunning, 33
lithium
parathyroidectomy
thyroidectomy
Clozapine, 359
dopamine systems
haloperidol
metoclopramide
stress ulcers
substantia nigra
ventral tegmental area
Coherent pattern, 485
blood pressure
catecholamines
corticosterone
rats, males
social behavior
Compensatory adjustments, 297
anticipatory drinking
local rate of intake
Conditioned food aversion
anorexia nervosa, 245, 401
zinc deficiency, 245, 401
Conditioned taste aversion, 591
amino acids
food intake
GABA
Constant-light housing, 183
circadian activity rhythms
geniculo-hypothalamic tract-ablation
hamsters
Copulation regulation, 351
GABA-B receptors
GABAergic system
penile reflexes
Corticosterone
blood pressure, 485
catecholamines, 485
coherent pattern, 485
fowl, domestic, 249
heterophil/lymphocyte ratio, 249
osmotic minipumps, 249
rats, males, 485
social behavior, 485
tonic immobility, 249
Current intensity, 605
heat-loss responses
intracranial self-stimulation

Deer mouse, 131
analgesia
benzodiazepine systems
scent
2-Deoxy-D-glucose analgesia, 465
alloxan
drug interaction
Diet composition, 551
carcass composition
food intake
Dietary fat selection, 389
adiposity
weight cycling
Dietary protein, 1
blood parameters
carbohydrates
cats
stress
Dihydrotestosterone levels, 199
estrous cycle
lordosis regulation
Diurnal rhythms, 477
gestation
lactation
Dominance, 255
aggression
monkey, stumptail
puberty
sexual behavior, monkeys
Dopamine systems, 359
clozapine
haloperidol
metoclopramide
stress ulcers
substantia nigra
ventral tegmental area
Drinking
fowl, domestic, 307
intravenous administration, 307
saline, 307
Drug
alloxan, 465
aminophylline, 83
d-amphetamine, 575
angiotensin II, 331
aspartic acid, 313
baclofen, 351
(+)bicuculline, 351
CGS 10686B, 319
clozapine, 359
3M D-glucose, 465
diazepam, 131, 461
epinephrine, 365
dl-fenfluramine, 319
FG 7142, 211
fluoxetine, 319
haloperidol, 359
isoproterenol, 331
lidocaine, 83
lipopolysaccharide, 287

lithium, 33
medroxyprogesterone, 343
metoclopramide, 359
midazolam, 211
morphine, 41
naloxone, 29, 131
nimodipine, 447
norepinephrine, 365
oxiracetam, 281
papaverine, 83
pindolol, 365
piracetam, 545
Ro15-1788, 131, 461
Ro15-3503, 211, 461
saline, 307
serine, 591
THIP, 351
threonine, 591
verapamil, 417
zinc, 245, 401
Drug interaction
ACTH, 41
aggression, 83
alloxan, 465
analgesic efficacy, 41
2-deoxy-D-glucose analgesia, 465
lidocaine-kindled seizures, 83
morphine tolerance, 41

Eating
appetite, 319
carbohydrates, 319
CGS 10686B, 319
dl-fenfluramine, 319
fluoxetine, 319
nutrition, 319
protein, 319
Electrical stimulation
feeding, 113
lizards, 113
response suppression, 167
septum, 167
Electrophysiological measures, 163
age differences
locomotor activity
occipital cortex
superior colliculus
β-Endorphin, 125
behavioral responses
isolation
stress
Energy balance, 365
catecholamines
chronic exercise
Estrous cycle
dihydrotestosterone levels, 199
lordosis regulation, 199
shock threshold, 617
stress, 617
Estrous/diestrous preferences, 379
prairie voles
sexual behavior, male prairie vole
Exercise, 65
hypocaloric diet
obesity
plasma levels

Feeding, 113
electrical stimulation
lizards
dl-Fenfluramine, 319
appetite
carbohydrates
CG 10686B
eating
fluoxetine
nutrition
protein
Fetal testosterone exposure, 7
maternal aggression
prenatal stress
Fluid intake, 331
lesions, AV3V
lesions, MPO
Fluoxetine, 319
appetite
carbohydrates
CG 10686B
eating
dl-fenfluramine
nutrition
protein
Food intake
amino acids, 591
ammonium acetate, 471
carcass competition, 551
conditioned taste aversions, 591
diet composition, 551
GABA, 591
high protein diet, 471
Forced swim test, 93
behavioral despair
immobility
sinking/floating behavior
Fowl, domestic
corticosterone, 249
drinking, 307
heterophil/lymphocyte ratio, 249
intravenous administration, 307
osmotic minipumps, 249
saline, 307
tonic immobility, 249
Free-running rhythm, 87
rats, blinded female
running wheel
Freezing
active avoidance, 439
hyperdefensiveness, 145
intermale aggression, 613
lesions, amygdala, 613
lesions, cerebellar vermis, 145
light-dark box, 439
passive avoidance, 439
spontaneous mouse killing, 145
strain differences, 439

GABA, 591
amino acids
conditioned taste aversion
food intake
GABA-B receptors, 351
copulation regulation
GABAergic system
penile reflexes
GABAergic system, 351
copulation regulation
GABA-B receptors
penile reflexes
Geniculo-hypothalamic tract-ablation, 183
circadian activity rhythms
constant-light housing
hamsters
Gerbils, female Mongolian, 15
sexual development rate
uterine position
Gestation, 477
diurnal rhythms
lactation

Haloperidol, 359
clozapine
dopamine systems
metoclopramide
stress ulcers
substantia nigra
ventral tegmental area
Hamsters
circadian activity rhythms, 183
constant-light housing, 183
geniculo-hypothalamic tract-ablation, 183
melatonin, 173
photoperiod, 173
temperature, 173
thermoregulatory behavior, 173
Heat exposure, 599
intracranial self-stimulation
lever-pressing behavior
thermoregulatory behavior
Heat-loss responses, 605
current intensity
intracranial self-stimulation
Heterophil/lymphocyte ratio, 249
corticosterone
fowl, domestic
osmotic minipumps
tonic immobility
High protein diet, 471
ammonium acetate
food intake
Histochemical identification, 529
PVN-hindbrain feeding pathway
Hormonal restoration, 77
castration
sexual behavior
Hormone
ACTH, 41
aldosterone, 137
dexamethasone, 137
dihydrotestosterone, 199, 569
β-endorphin, 125
estradiol benzoate, 77
estrogen, 179
progesterone, 179, 271

benzodiazepines
sham feeding
Inhibition, 557
sexual behavior, female hamsters
transient facilitation
Insular gustatory cortex, 223
hunger
monkey
neuron responsiveness
Intermale aggression, 613
freezing
lesions, amygdala
Intracranial self-stimulation
current intensity, 605
heat exposure, 599
heat-loss responses, 605
lever-pressing behavior, 599
thermoregulatory behavior, 599
Intravenous administration, 307
drinking
fowl, domestic
saline
Isolated microorganism, 397
locomotion tracking
Isolation, 125
behavioral responses
β-endorphin
stress

Lactation
diurnal rhythms, 477
eating, 7
gestation, 477
hyperphagia, 7
litter size, 109
naloxone, 7
opiates, 7
pregnancy, 109
preweaning nutrition, 109
weight gain, 109
Learned helplessness, 545
piracetam
stress
Lesions, amygdala, 613
freezing
intermale aggression
Lesions, AV3V, 331
fluid intake
lesions, MPO
Lesions, bilateral ibotenic acid, 231
basolateral amygdala
sham feeding response
sucrose
Lesions, cerebellar vermis, 145
freezing
hyperdefensiveness
spontaneous mouse killing
Lesions, fimbria, 575
d-amphetamine
memory
Lesions, hippocampal perforant pathway, 371
lesions, medial perforant pathway
object distinctiveness
reaction to novelty
Lesions, lateral/medial septal, 97
activity/reactivity measures
locomotor activity
Lesions, medial perforant pathway, 371
lesions, hippocampal perforant pathway
object distinctiveness
reaction to novelty
Lesions, MPO, 331
fluid intake
lesions, AV3V
Lesions, ventromedial hypothalamic, 179
cholinergic control
sexual behavior, female rat
Lever-pressing behavior, 599
heat exposure
intracranial self-stimulation
thermoregulatory behavior
Lidocaine-kindled seizures, 83
aggression
drug interaction
Light-dark box, 439
active avoidance
freezing
passive avoidance
strain differences
Light exposure, 141
Alzheimer's disease
circadian rhythm
human studies
Lipopolysaccharide, 287
biotelemetry
chronic infusion
Lithium, 33
circadian wheelrunning
parathyroidectomy
thyroidectomy
Litter size, 109
lactation
pregnancy
preweaning nutrition
weight gain
Lizards, 113
electrical stimulation
feeding
Lizards, curly-tailed, 103
aggressive behavior
pineal complex
thermoregulation
Local rate of intake, 297
anticipatory drinking
compensatory adjustments
Locomotion tracking, 397
isolated microorganism
Locomotor activity
activity/reactivity measures, 97
age differences, 163
electrophysiological measures, 163
lesions, lateral/medial septal, 97
occipital cortex, 163
superior colliculus, 163
Lordosis regulation, 199
dihydrotestosterone levels
estrous cycle

Macronutrient selection pattern, 581
adrenalectomy
chronic corticosterone
Main olfactory system, 217
recognition
Maternal aggression, 7
fetal testosterone exposure
prenatal stress
Mating, 19
chemosignals
infanticide
vomeronasal system
Medroxyprogesterone acetate, 343
animal models
plasma testosterone
sexual behavior, male monkeys
Melatonin, 173
hamsters
photoperiod
temperature
thermoregulatory behavior
Memory
d-amphetamine, 575
calcium antagonist, 447
lesions, fimbria, 575
simple associational learning, 447
Method
forced swim test, 93
gas chromatography/mass spectrometry, 119
horseradish peroxidase, 529
immunocytochemistry, 529
light-dark box test, 439
Metoclopramide, 359
clozapine
dopamine systems
haloperidol
stress ulcers
substantia nigra
ventral tegmental area
Milk availability, 507
behavioral interactions
milk intake
Milk intake, 507
behavioral interactions
milk availability
Monkeys, 223
hunger
insular gustatory cortex
neuron responsiveness
Monkeys, squirrel, 53
age differences
sucrose solutions
taste preference
Monkeys, stumptail, 255
aggression
dominance
puberty

sexual behavior, monkeys
Morphine tolerance, 41
ACTH
analgesic efficacy
drug interaction
Motivational-emotional mechanisms, 207
behavioral/electrophysiological methods
shelter-seeking
Multiunit evoked activity, 417
peripeduncular nucleus
rats, females
sexual receptivity
verapamil

Neonatal testosterone administration, 453
sexual behavior, mice
uterine position
Nesting, 271
pairing
progesterone
social behavior
Neuron responsiveness, 223
hunger
insular gustatory cortex
monkey
Non-opioid defeat analgesia, 461
benzodiazepine antagonists
potent inhibition
Ro15-3505
Novel stimuli, 29
analgesic response

benzodiazepines, 211
ingestional responses, 211
lesions, bilateral ibotenic acid, 231
sucrose, 231
Sheep, 491
pregnancy
salt-appetite
Shelter-seeking, 207
behavioral/electrophysiological methods
motivational-emotional mechanisms
Shock threshold, 617
estrous cycle
stress
Simple associational learning, 447
calcium antagonist
memory
Sinking/floating behavior, 93
behavioral despair
forced swim test
immobility
Snails, 29
analgesic response
novel stimuli
opioid analgesia
stress
Social behavior
blood pressure, 485
catecholamines, 485
coherent pattern, 485
corticosterone, 485
nesting, 271
pairing, 271
progesterone, 271
rats, males, 485
Socially-induced diet choice, 119
carbon disulfide
semiochemical
Spontaneous mouse killing, 145
freezing
hyperdefensiveness
lesions, cerebellar vermis
Starch, 409
overeating
overweight
Strain differences
active avoidance, 439
behavioral energy regulation, 433
body fluid homeostasis, 499
castration, 69
freezing, 439
light-dark box, 439
passive avoidance, 439
sexual behavior, masculine, 69
water intake, 499
Stress
analgesic response, 29
arterial pressure, 563
behavioral responses, 125
blood parameters, 1
carbohydrates, 1
cats, 1
cimetidine-sensitive analgesia, 563
dietary protein, 1
β-endorphin, 125
estrous cycle, 617
isolation, 125
learned helplessness, 545
novel stimuli, 29
opioid analgesia, 29
piracetam, 545
shock threshold, 617
snails, 29
Stress ulcers, 359
clozapine
dopamine systems
haloperidol
metoclopramide
substantia nigra
ventral tegmental area
Stressor controllability, 323
analgesic responsiveness
pituitary-adrenal hormone concentration
pregnancy
Substantia nigra, 359
clozapine
dopamine systems
haloperidol

metoclopramide
stress ulcers
ventral tegmental area
Sucrose
age differences, 53
basolateral amygdala, 231
lesions, bilateral ibotenic acid, 231
monkeys, squirrel, 53
sham feeding response, 231
taste preference, 53
Superior colliculus, 163
age differences
electrophysiological measures
locomotor activity
occipital cortex
Sympathoadrenal response, 293
aerobic training
human studies
psychosocial stress
Synapses, 423
human studies
reaction time
tactile reaction neuronal circuits
thinner sniffing
Synthetic odorants, 265
odor-guided behavior
rearing environment odorization

Tactile reaction neuronal circuits, 423
human studies
reaction time
synapses
thinner sniffing
Taste preference, 53
age differences
monkeys, squirrel
sucrose solutions
Temperature, 173
hamsters
melatonin
photoperiod
thermoregulatory behavior
Testosterone aromatization, 457
sexual behavior, male ferret
Thermoregulation, 103
aggressive behavior
lizards, curly-tailed
pineal complex
Thermoregulatory behavior
hamsters, 173
heat exposure, 599
intracranial self-stimulation, 599
lever-pressing behavior, 599
melatonin, 173
photoperiod, 173
temperature, 173
Thinner sniffing, 423
human studies
reaction time
synapses
tactile reaction neuronal circuits
Thyroidectomy, 33
circadian wheelrunning
lithium
parathyroidectomy
Tonic immobility, 249
corticosterone
fowl, domestic
heterophil/lymphocyte ratio
osmotic minipumps
Transient facilitation, 557
inhibition
sexual behavior, female hamsters

Urine marking, 41
aggression
water deprivation
Uterine position
gerbils, female Mongolian, 15
neonatal testosterone administration, 453
sexual behavior, mice, 453
sexual development rate, 15

Ventilation, 313
aspartic acid
sex differences
Ventral tegmental area, 359
clozapine
dopamine systems
haloperidol
metoclopramide
stress ulcers
substantia nigra
Verapamil, 417
multiunit evoked activity
peripeduncular nucleus
rats, females
sexual receptivity
Vomeronasal chemoreception, 303
infanticide
vomeronasal organ
Vomeronasal organ, 303
vomeronasal chemoreception
infanticide
Vomeronasal system, 19
chemosignals
infanticide
mating
Vomeronasal system anatomy, 155
antelopes, alcelaphine
chemosensory investigation

Water deprivation, 41
aggression
urine marking
Water intake, 499
body fluid homeostasis
strain differences
Weight cycling, 389
adiposity
dietary fat selection
Weight gain, 109
lactation
litter size
pregnancy
preweaning nutrition

Zinc deficiency
anorexia nervosa, 245, 401
conditioned food aversion, 245, 401
